

DSI2.5 $\pm 25g$ to $\pm 375g$ X-Axis, Medium- or High-g, Digital Inertial Sensor

MMA26xx

Not Recommended for New Designs

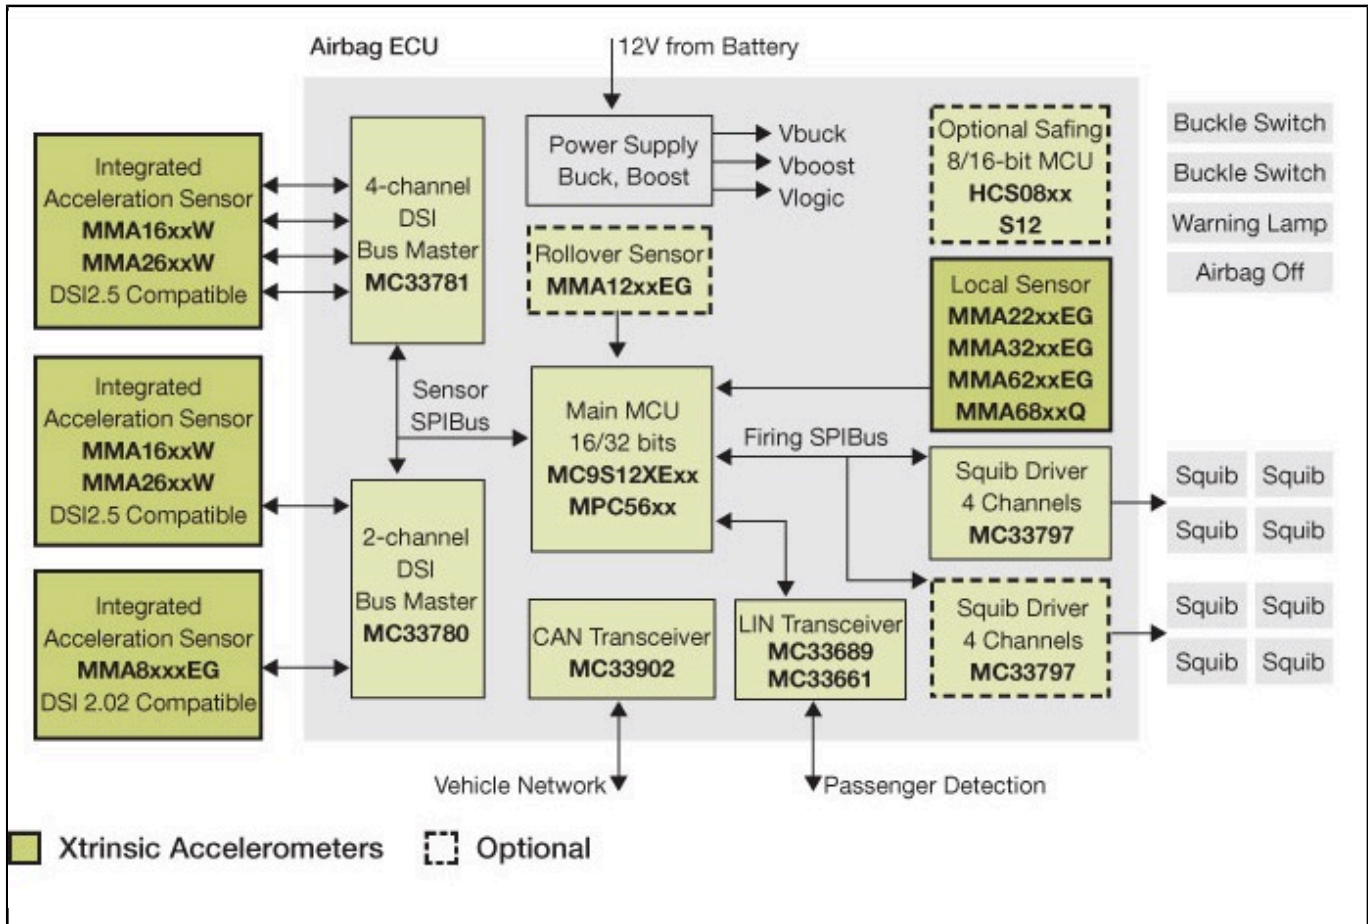

This page contains information on a product that is not recommended for new designs.

Last Updated: Sep 26, 2023

The MMA26xxW and MMA26xxNWR2 inertial satellite sensors support the DSI communication protocol for front and side crash detection in automotive applications.

- Offers the only supplier with an x-axis over-damped inertial satellite sensor housed in a QFN package
- Enables a smaller footprint and more flexibility for module orientation in vehicles
- Provides [SafeAssure](#) functional safety
