

MPU / Linux[®] Hosted Matter Development Platform

MPU-LINUX-MATTER-DEV-PLATFORM

Last Updated: Feb 21, 2023

NXP's MPU/Linux Hosted Matter Development platform includes the hardware, software and enablement needed to create advanced end devices using Matter over Wi-Fi and Thread that act as mesh extenders, Matter controllers or Thread Borders. Leveraging the IOTZTB-DK06 and [8MMINILPD4-EVKB](#) development boards (and optional boards OM-SE051ARD or OM-A5000ARD), customers can use the Matter software found at the gituhub here: <https://github.com/NXPmicro/matter/tree/v1.0-branch-nxp/examples/all-clusters-app/nxp/linux-imx/imx8m>.
