

MPU / Linux® Hosted Matter Development Platform

MPU-LINUX-MATTER-DEV-PLATFORM

Last Updated: May 16, 2024

NXP's MPU/Linux Hosted Matter Development platforms includes the hardware, software and enablement needed to create advanced end devices using Matter over Wi-Fi and Thread that act as mesh extenders, Matter controllers or Thread Border Routers. These Development Platforms implement a hosted architecture using a range of the i.MX Linux portfolio along with the radio chip needed to support the targeted use case.
