

S32G2 Processors for Vehicle Networking

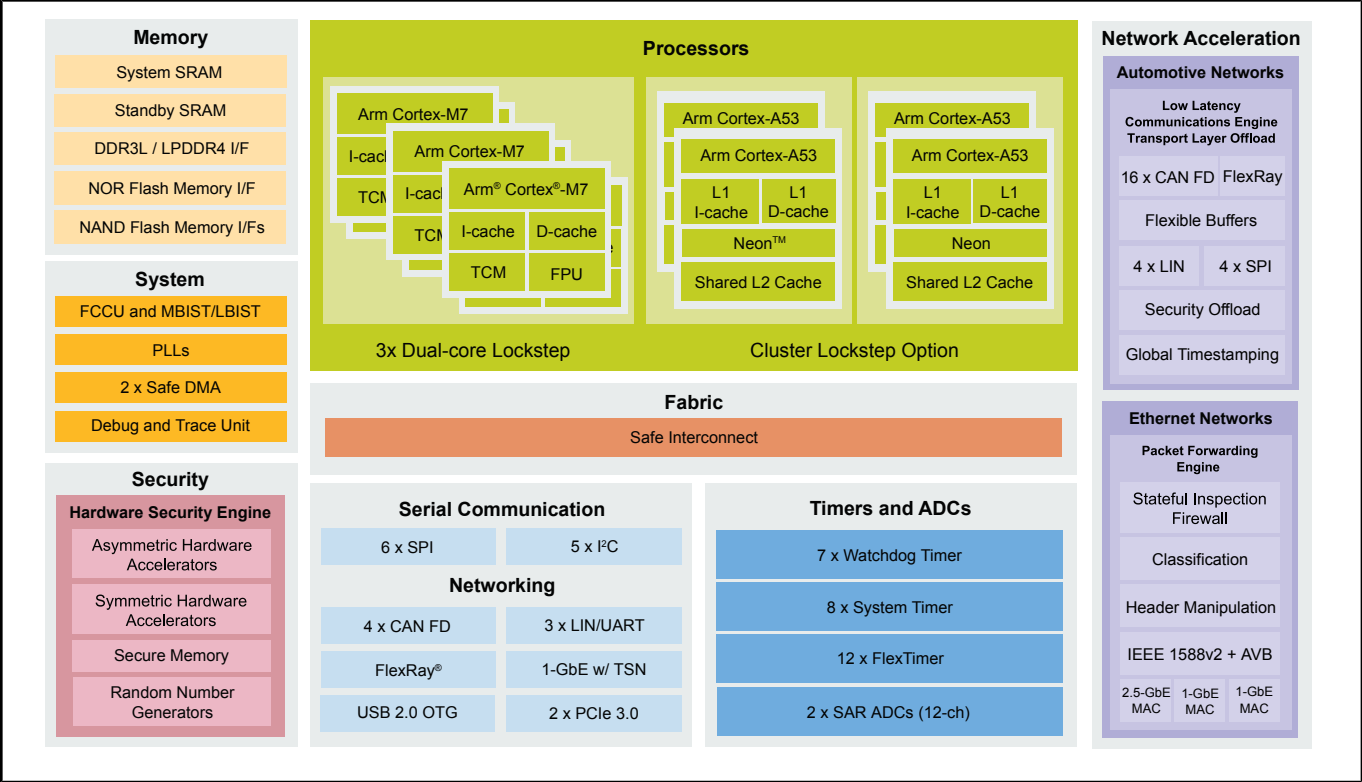

S32G2

Last Updated: May 16, 2024

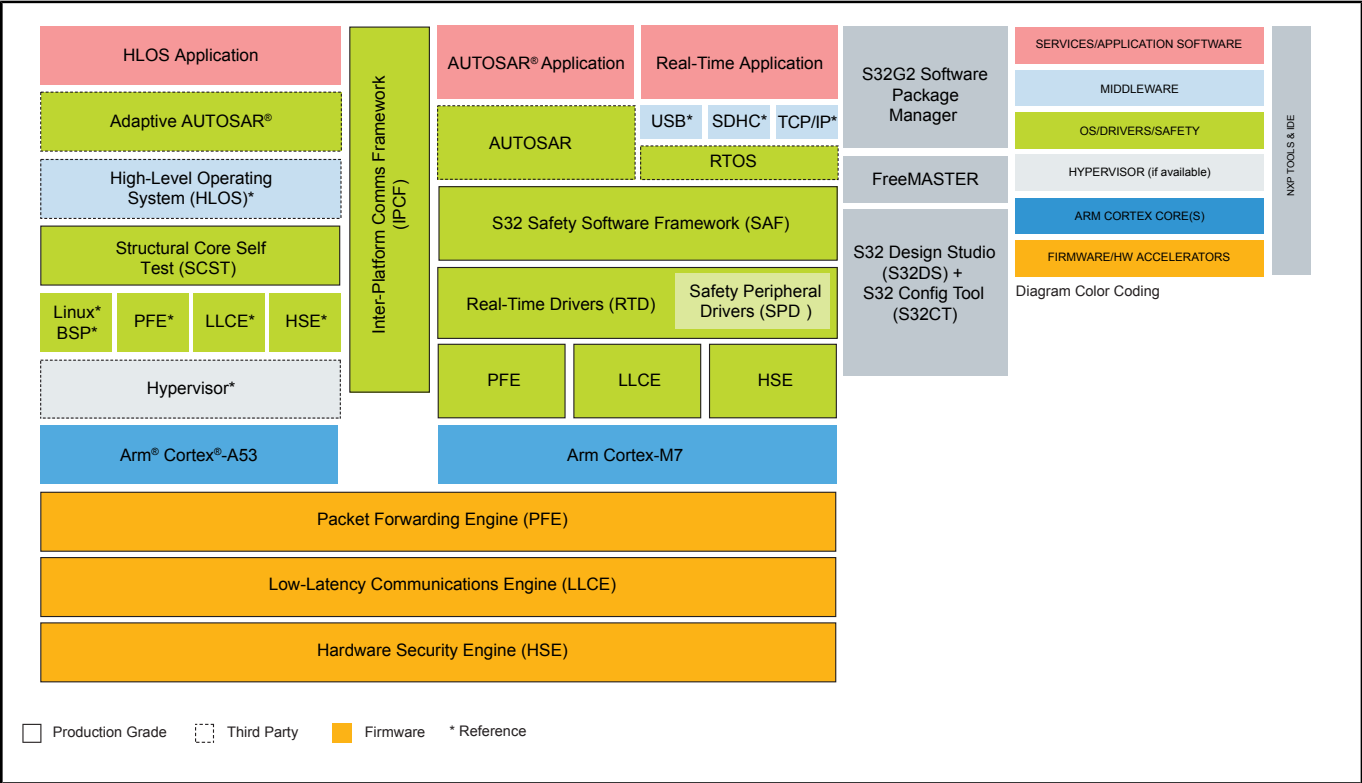

S32G2 vehicle network processors combine ASIL D safety, hardware security, high-performance real-time and application processing and network acceleration. S32G2 supports the needs of new vehicle architectures: service-oriented gateways, domain controllers, zonal processors, safety processors and more.

The S32G2 vehicle network processors are supported by a broad range of software enablement that is comprised of Reference Software, Standard Software and Premium Software, in addition to support from the S32 Design Studio IDE.
