

Development Board for PN7220 NFC Controller for EMVCo 3.1 and NFC Forum Operation

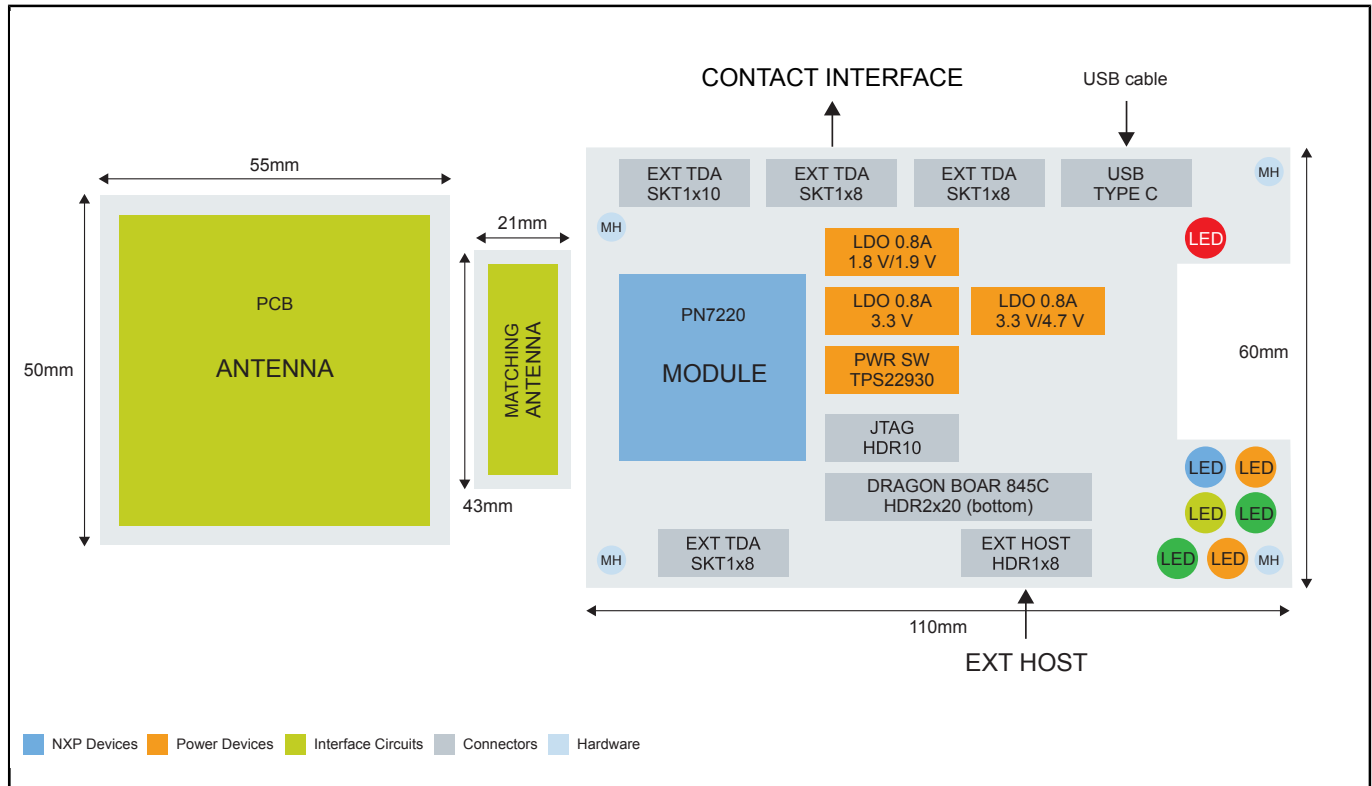

PNEV7220BP1

Last Updated: Jul 12, 2024

PNEV7220BP1 is a flexible and easy-to-use development board which can be connected to a [i.MX 8 microcontroller](#) running Android. The PNEV7220BP1 supports the design cycle of contactless payment terminals based on the [NFC controller PN7220](#). NFC Forum and EMVCo 3.x applications can be quickly evaluated.

With PN7220, POS manufacturers can expand their products to the new SoftPOS payment device category. With an EMV Level 1-compliant performance, PN7220 provides high performance to the user, while the NCI interface offers seamless integration into Android.
