WAREHOUSE-MANAGEMENT

Last Updated: Apr 23, 2024

NXP has a long history of leadership in developing and deploying industry standards. Zigbee networks can participate in the "Internet of Things" (IoT), in both residential and commercial markets, allowing network nodes such as HVAC, lighting and security devices to be remotely monitored and controlled by devices on the Internet.

This system also keepS track of the Components stock levels and when require replenishment, it will raise a notification to the system.
